TOBACCO INDUSTRY RESEARCH COMMITTEE

Activated 4/15/59

150 East Forty Second Street

New York 17, N.Y.

Application For Research Grant Renewal

Date: February 1, 1960

1. Name of Investigator: Russell W. Weller, M.D.

2. Title: Pathologist

3. Institution & Address: Memorial Hospital of Chester County
Chester County Hospital

(both in West Chester, Pennsylvania)

4. Project or Subject: A Complete and Detailed Microscopic and Medical Historical Study of Human Bronchial Mucosa from Autopsied Patients.

5. Detailed Plan of Procedure:

Selected series of lungs from rural and urban adult smokers and non-smokers are studied microscopically by dissection and blocking of cross sections of the distal trachea and the complete bronchial tree as illustrated on the enclosed diagram (200 to 250 sections from each case). (see Progress Report attachment)

The changes and their anatomical locations are recorded.

This study, although in some ways comparable to that of Auerbach et al, would appear to be more complete in evaluation of pathological changes and will probably provide material for re-evaluation of the atypical hyperplastic and early malignant changes so frequently observed by the above investigators.

6. Budget Plan:

Salaries	$ 8,000.00
Expendable Supplies	1,250.00
Permanent Equipment	-----
Overhead (10%)	925.00
Other	------
Total	$10,175.00

7. Anticipated Duration of Work: 12 months

8. Facilities and Staff Available: As in original application (12.21.56)
